Range hood

Range hoods that scored highest in our tests were **best at containing and exhausting smoke and fumes and quickly exchanging air**. Several were also notably quieter than others and better at delivering both high and low levels of lighting. And all we tested offer stainless steel. The **Ratings** list range hoods in performance order by type.

Recommended Range hoods

Recommended models are those that, based on our expert evaluation, deserve special consideration. We highlight high-scoring models that **combine performance, features and value** so that you can choose the product that best suits your budget and lifestyle.
